

Tally - Financial Management Application

🌟 What Tally Can Do

Tally is a comprehensive financial dashboard application built with Next.js and Supabase. It enables organizations to manage their accounts, expenses, deposits, and vendor relationships in a unified interface.

Key Features:

- **Automated Receipt Processing:** Upload receipts and automatically extract the amount, date, and vendor using integrated OCR processing.
- **Expense Tracking:** Manage business expenses through customizable approval workflows (`draft` , `approved` , `reconciled`).
- **Chart of Accounts:** Organize finances with standard account types (assets, liabilities, equity, revenue, and expenses).
- **Vendor Management:** Maintain a directory of your vendors and link them directly to expenses.
- **Role-Based Access Control:** Manage access for different users within an organization (`owner` , `admin` , `accountant` , `viewer`).

🚀 How to Use Tally

1. Getting Started

- **Start the Application:** Run `npm run dev` in your terminal to launch the development server.
- **Access the App:** Open your browser and navigate to `http://localhost:3000` .
- **Authentication:** You will be greeted by the login or register screen. Sign up or log in to access the main dashboard.

2. Navigating the Dashboard

Once logged in, the sidebar provides access to all core modules:

- **Dashboard:** A high-level overview of your cash flow and recent financial activities.
- **Expenses:** Create new expenses, link them to vendors, assign them to accounts, and track their status from draft to reconciled.
- **Receipts:** Upload receipts here. The built-in OCR feature will attempt to extract the key details for you to convert them directly into expenses.
- **Deposits:** Record incoming funds and link them to your revenue accounts.
- **Accounts:** Define and manage your custom Chart of Accounts.
- **Vendors:** Keep track of the people and companies you do business with.
- **Reports:** Generate and view financial reports and cash flow charts.
- **Settings:** Manage your organization's details, team member roles, and individual user profiles.

3. Typical Workflow

1. Start by navigating to **Accounts** and **Vendors** to set up your basic financial structure and contacts.
2. Go to **Receipts** to upload invoices or receipts. The system will automatically process the image using OCR.
3. Once processed, use the extracted data to quickly generate **Expenses**, linking the vendor and the appropriate expense account.
4. Review the **Dashboard** and **Reports** regularly to monitor cash flow and organizational spending.
